

HAND IN HAND

Written by Susan O'Dell

Provide various shades of construction or craft paper that reflects the many complexions of people around the world. Using the entire 12" length, trace your hand on the paper and continue down the arm. Cut them out. Now trade arm pieces with friends to get four different outlines. Assemble them in an interlocking square by having the hands "hold" the wrist of the next hand. Glue down fingers on the wrist it is "holding". While they work, you can talk about how we cooperate together to reach all the people in the world with the good news about Jesus. For a class-sized project connect all the hands in one giant circle.
