

## The Idea Hoarder

For the Activity Collector in You

### Opening Activity/Challenge

Mix 6 cups water with ½ cup dish liquid, ½ cup cornstarch, 1 Tbsp. baking powder, and 1-2 oz of glycerin. The mix is milky at first but clears. Make or provide bubble wands. This is a great solution for large bubble wands.

### GIANT BUBBLES

### Game Activity

This game will crisscross your room with yarn or streamers as kids connect the events of your Bible study in order. For instance, when studying the creation story, put up pictures of the things created by God on each day. Make two sets of pictures on different colors for team play and scatter them around the walls. When you say go, kids attach their yarn to the next picture in the creation order. With each new day of creation, they are leaving a trail of yarn crisscrossing the room. This web of yarn makes it harder to get to the next connection point. Step over, crawl under, and find the next thing God made! Point out that your game created some chaos but God created perfection!

### CONNECT THE DOTS

### Craft Activity

Kids get to design their own animal. Provide pieces of cardboard 8 inches square. Let kids wrap yarn around and around the cardboard. Tie all the pieces together on one side of the cardboard then cut the bundle of yarn on the opposite side of the tie. You now have a large, loose pom pom. Arrange the pom over a small 3 oz cup. Secure it with a glue gun or self-stick dot. Use the same glue to personalize your critters. Add chenille stick antlers, feather wings, wiggle eyes, and pom ball accents. Provide cardstock for kids to cut out arms or giant feet to peek out of their furry creation. Provide ribbon in case your girls want to add a bow! Can you imagine having to design all the animals in our world today? God did it! He even made YOU unique!

### CREATE A CRITTER

### Activity

Fill a big tub with water. Provide several items for children to fill, pour, and play with in the water. Make sure to put a tablecloth under your water play center. Talk to the children about how God created water and all things.

### Water Play
